

CONTINUOUS MOISTURE MANAGEMENT. TRANSFORMER LIFE EXTENSION.

Moisture is the root cause of insulation aging in power transformers. DryTrans systems continuously remove moisture from oil, and from the insulation — protecting your asset 24/7.

REMOVES MOISTURE
CONTINUOUSLY

SLOWS INSULATION
AGING

IMPROVES RELIABILITY
& PERFORMANCE

EXTENDS ASSET
LIFE

WHY DRYTRANS?

- Online, continuous dehydration
- Removes moisture from oil & insulation system
- Reduces risk of failures
- Increases transformer reliability
- Low maintenance, high efficiency

BECAUSE A DRY TRANSFORMER IS A RELIABLE TRANSFORMER.

LOWER
MOISTURE

BETTER
INSULATION HEALTH

REDUCED
BREAKDOWN RISK

LONGER
WORKING LIFE
