

INTRODUCING

The **SMALLEST** and Most **RELIABLE**
Moisture Management System for
5 MVA Transformers and under.

(Dimensions: 290 x 820 x 390 mm)

DryTrans

Smart Moisture Management Systems

DryTrans have developed a series of moisture management systems to effectively reduce the moisture in the solid insulation using the oil as the medium. All our systems are designed with a singular purpose of implementing a user-friendly, trouble-free, state of the art system which can be maintained and serviced easily at the site.

BENEFITS

- Low-cost solution for distribution transformers
- Extends the life of new and old transformers
- Continuous on-line moisture reduction
- Easy to install as new or even retro fit
- Reduction in transformer preventive maintenance costs
- Reduce transformer dry-out costs
- Improve transformer dielectric strength
- Improves the power factor of transformer insulation
- Extend transformer & oil service life

Quick & Easy Installation:
Installs in Less than 2 Hours

Flow Rate
300 LPH - 500 LPH
Moisture Adsorbancy
3-5 Litres

100%

LEAK PROOF

Manufactured in the United Arab Emirates (G.C.C)
